TECSUP
Énergie & éclairage autonomes

Since 1985, TECSUP designs and manufactures, in small and medium series, **innovative solutions for energy and autonomous lighting**, indoor and outdoor, for equipment and mobile workers.

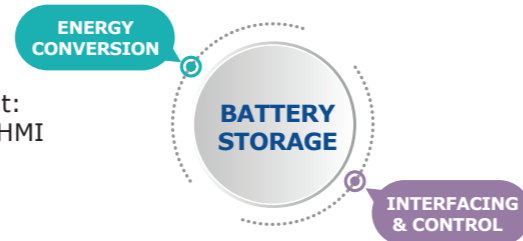

Let's release your energy !

Collaborative technical expertise

- **Continuous innovation** via a sustained R&D program
- Energy conversion, storage (batteries), interfacing and control
- **Extensive design office**, experienced in co-development: design, electronics, BMS (battery management system), HMI (human-machine interface), industrialization
- **Creative engineering** optimized by the diversity of cases treated

Productive mastery

• Latest generation battery manufacturing line

• Assembly workshop

• Test benches

Quality excellence

- **Extensive customer service:** advice, experts, long-term support, direct contact with the design office, flexible manufacturing (SME), responsive after-sales service.

- **Skills and involvement of staff** at each stage of the process

Need analysis

Design

Prototyping

Manufacturing

Control

After-sales service

- **Normative validation** according to the specific requirements of each application
- **Reinforced traceability** (ERP, GED)
- **Environmental commitment:** high efficiency solutions limiting energy loss, valorisation of clean energies

+ AUTONOMY
